**Subject:** Greenwood home/ west lake development/ city council.

Hi Miriam, would it be possible for you to forward this to all city council members.

Honorable council members;

On nov 13th you will be gathering to discuss the development of green wood homes, please note increasing the density of this area will ruin our historic charm. Also having entry and exit on one street (Denton ave) will create congestion in this small st. There will be a big problem when vehicles exiting from greenwood homes at night, their head lights will be in direct path into our living room and constant traffic noise. I am sure you would not want this if this was your home. There has to be two different streets for entry and exit for safety reasons. (Eden & Denton ) The entire plan should be redesigned and we are willing to work with west lake on this. I had mentioned this a year ago when we had our first meeting at Chabot college but, I've been ignored.

I trust city council will support its citizens and not the big developers.

Yours truly,  
Citizen Sam ( making hayward healthy & great )
